DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a copper agonist which binds to the copper binding site of the amyloid precursor protein and/or reduces or prevents release of A β peptide.

Group II, claim(s) 4, drawn to the use of the copper agonist of Group I for prevention or treatment of Alzheimer's disease.

Group III, claim(s) 5-9, drawn to a method of identifying a copper agonist which binds to the copper binding site of APP and/or exerts an inhibitory effect on the release of the amyloid A β peptide.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claims are directed to a copper agonist characterized in that it reduces or prevents release of A β peptide, a method of making and a method of using said copper agonist. As such, the Inventions are united by the technical feature of the copper agonist. It is noted that the term "copper agonist" is defined on page 3 of the specification as any substance which can bind to the copper-binding site of APP or reduce or prevent release of the amyloid A β peptide. Thus, the copper agonist is not limited to binding to the copper-binding site of APP. Borchardt *et al.* (2000) *Cell. Mol. Biol.* 46:785-795 teach that zinc reduce or prevent release of the amyloid A β peptide and thus meets the limitations of the copper agonist claimed in Group I. As zinc is was

well known in the art at the time of filing, the technical feature uniting the Inventions does not represent a contribution over the prior art. Therefore, the Inventions lack a corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel M Sullivan whose telephone number is 703-305-4448. The examiner can normally be reached on Monday through Friday 8-4:30.
